Forecast For The United Kingdom
Issued by Met Office Exeter
at 1600 on Thursday 27 May 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Friday a cloudier day than Thursday for most.

This Evening and Tonight:
Cloud will spread eastwards across much of the UK, bringing outbreaks of rain to Northern Ireland and western parts of Scotland, Wales and England. Staying clearer in the far north and east where chilly with a few fog patches.

Friday:
Rather cloudy for many, cloud over Northern Ireland and western parts of Scotland, Wales and England thick enough for rain at times. Brighter in the far north and far southeast.

Outlook for Saturday to Monday:
The odd shower in places on Saturday, otherwise largely dry with increasing amounts of sunshine and turning warmer for most. Rain possible in the far northwest on Monday.
